

## Data Centric Web Applications Project 2023 – G00396372 Kyle Keenan

Innovation file.

Added a simple add-products.ejs file which allowed me to update the existing MySQL database with new products, which have minimum character requirements exactly like adding a new manager.

Product id, description, store ID, location & price required the delete button will also be added alongside it.

Snapshots:

### Add New Product

Product ID (5 characters minimum)   
Description (10 characters minimum)   
Store ID (5 characters minimum)   
Location   
Price   
  
[Back to Home](#)

## Products

Product ID	Description	Store ID	Location	Price	Action
CATF1	100g Cat Food Tins	CBARM	Castlebar MAYO	4.99	<input type="button" value="Delete"/>
